Founded in 2005, "Roohani Alloys" is a pioneering force in investment casting. With roots in business dating back over two decades, we have established enduring relationships with top companies across India. Our expertise lies in manufacturing high-quality products such as Investment Casting For Railways Parts, Investment Casting For Metro Parts, Casting For General Engineering, Cookware Product for glass applications.

As a GST-verified company, we proudly serve markets across the country, ensuring that our products meet the highest standards of precision and reliability. Operating as a sole proprietorship, we remain committed to innovation and excellence in every project we undertake.

Our company specializes in a diverse range of products such as casting products, including Investment Casting For Railways Parts, Investment Casting For Metro Parts, Casting For General Engineering, Cookware Product. Each product is meticulously crafted with precision and a strong commitment to quality, ensuring reliability and excellence across various applications.

We, at Roohani Alloys, manufacture a wide range in investment casting . We are making Products like S.Trape for Indian Rail coaches and connector for electricity , Implants for orthopedic industry , Spiders and fittings for Glass & hardware industries, union for Dairy industry and automobile industries. We have complete facility for making investment casting. We have complete machining shop R & D department, everything we done in one roof.

We can supply wide range of Casting like stainless steel casting, heat-resistant steel casting, , alloy steel casting, and many other materials like, SS 304, SS 316, SS 316L, Inconel 825, Inconel 625, Monal 400, Alloy 20, Duplex and other high alloys like Nickel, Molybdenum and Chrome etc. Moreover as per customer requirement,

Our company works in close co-ordination with its business associates to deliver perfect solutions as per their exact requirement. We have Germany make spectrometer for checking the chemical composition. We maintain consistency in product quality. Welcome to our company to be a witness our high quality products and excellent service.

Thanks for showing your interest in Roohani Alloys.

ABOUT US

Investment Casting For Metro Parts

Roohani Alloys provides precision investment castings for metro parts, ensuring safety, durability, and high performance in transportation applications. Our castings are made with advanced metallurgical processes, meeting stringent industry standards.

Features:

- High-precision investment castings
- Superior strength and impact resistance
- Lightweight yet durable
- Corrosion and heat-resistant
- Complies with metro industry specifications

We specialize in bulk supply for metro projects, ensuring large-scale availability with competitive pricing. Our investment castings are delivered on time, meeting the exact requirements of railway contractors and metro infrastructure developers.

Product Details:

Supplier	Roohani Alloys
Industry	Metro Transport & Infrastructure
Weight	Lightweight Yet Durable
Material	High-Precision Alloy
Heat Resistance	Yes

Casting For General Engineering

Our general engineering castings are manufactured with precision, meeting industrial standards for strength and performance. We provide castings for a variety of engineering applications, including machine parts, tools, and heavy-duty equipment.

Features:

- Manufactured using high-grade alloy materials
- High strength and wear resistance
- Suitable for various industrial applications
- Customization available as per client requirements
- Durable and cost-effective

We supply bulk orders of general engineering castings to industries across India. Our wholesale model ensures consistent quality, timely supply, and cost-effective pricing for manufacturers and engineering firms.

Product Details:

Durability	High Performance & Long Life
Major Market	All Over India
Material	Premium-Grade Alloy
Strength	High Tensile & Wear Resistance
Industry	General Engineering & Manufacturing

Cookware Product

Roohani Alloys specializes in high-quality cookware products, designed for durability and efficiency. Our cookware is made using premium-grade alloys, ensuring even heat distribution, corrosion resistance, and long-lasting performance. Available in various sizes and designs, our cookware is ideal for domestic and commercial use.

Features:

- Made from high-quality alloy materials
- Even heat distribution for efficient cooking
- Corrosion and rust-resistant
- Available in various sizes and finishes
- Designed for both home and commercial kitchens

As a wholesale supplier, Roohani Alloys ensures bulk availability at the most competitive prices. We cater to retailers, distributors, and bulk buyers across India with flexible order quantities and timely deliveries.

Product Details:

Wholesale Availability	Bulk Supply Across India
Major Market	All Over India
Industry	Cookware Manufacturing & Hospitality
Heat Distribution	Even and Efficient
Durability	Long-Lasting

Investment Casting For Railways Parts

We manufacture and supply investment castings for railway parts, ensuring top-tier quality for critical railway components. Our products are designed to withstand extreme conditions, offering reliability and long service life.

Features:

- High-strength alloy investment casting
- Resistant to wear, impact, and extreme weather conditions
- Precision-engineered for railway applications
- Lightweight and durable design
- Manufactured following industry regulations

Roohani Alloys is a trusted wholesale supplier of railway investment castings across India. We cater to railway contractors, suppliers, and government projects with bulk supply, competitive pricing, and consistent quality assurance.

Product Details:

Supplier	Roohani Alloys
Major Market	All Over India
Precision Engineering	Yes
Impact Resistance	High
Durability	Designed for Extreme Conditions

Spider One Way

Spider One Way is a modern and durable glass façade fitting designed to hold a single point of glass safely and elegantly. Commonly used in structural glazing systems, this fitting provides strong support while maintaining a sleek, frameless look—perfect for contemporary commercial and architectural projects. Made from high-grade stainless steel, the Spider One Way offers excellent corrosion resistance, long life, and reliable load-bearing performance. It allows secure fixing of glass panels while ensuring maximum transparency and a clean aesthetic finish.

Key Features:

- Supports single-point glass fixing for façades and entrances
- Made from premium stainless steel for strength & durability
- Corrosion-resistant, weather-proof & long-lasting
- Provides a clean, modern, frameless architectural appearance
- Ideal for malls, offices, showrooms, high-rise buildings & glass partitions
- Easy installation with precise alignment and secure grip

Spider Two Way

Spider Two Way is a high-strength architectural fitting designed to support glass panels at two connection points, offering enhanced stability and a modern frameless appearance. Commonly used in structural glazing systems, this fitting helps create sleek, transparent façades that elevate the aesthetics of commercial and residential buildings. Manufactured from premium-grade stainless steel, the Spider Two Way ensures superior durability, corrosion resistance, and long-term performance even in harsh weather conditions. It provides secure glass anchoring while maintaining a clean and seamless visual finish.

Key Features:

- Dual-point support for stronger and more stable glass fixing
- Made from high-quality stainless steel for strength & longevity
- Corrosion-resistant, weather-proof & low-maintenance
- Creates clean, modern, frameless glass façades
- Ideal for malls, office buildings, showrooms, atriums, and glass partitions
- Easy installation with precise alignment and firm glass grip
